REASONS FOR ALLOWANCE

1. Claims 1-14, 16-20, and 23-25 are allowed.
2. The following is an examiner's statement of reasons for allowance:
3. Applicant's Claimed invention is drawn to a variable width memory system wherein a plurality of single cell variable width memory locations receive a number of bits corresponding to the width of the single cell variable width memory locations and the width of a variable width register that is located in a processor associated with said variable width memory system, and a variable width mapping process provides a correlation between said single cell variable width memory locations and said variable width register. Said number of plurality of bits vary automatically one a per access basis depending on which single cell variable width memory location of said plurality of single cell variable width memory locations is being accessed, wherein all memory locations are not required to have the same width.
4. The Prior Art of Record does not teach nor suggest in the claimed combination a variable width memory system wherein the width of the variable width memory cell is dependent on the width of a corresponding variable width register that is located in a processor that is associated with the variable width memory system.
5. Applicant's arguments, presented in pages 8-11 of the Appeal Brief were particularly persuasive. The examiner's consideration of Applicant's arguments as well as the examiner's observations above have resulted in the allowance of this application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
